The Mansion Bougenville Tower Gloria, Jl. Trembesi No.D-4, Pademangan Tim., Kec. Pademangan, Jkt Utara, Daerah Khusus Ibukota Jakarta 14410

An undergraduate student from BINUS University who eager to learn anything about software development and web development. Currently pursuing a bachelor's degree in Computer Science, with a focus on Software Engineering. Proficient in various programming languages like C and Java but also familiar with others like Javascript and Python. Continuously improving at problem-solving, collaboration, and continuous learning, eager to contribute technical skills and creativity to innovative projects.

PROJECT AND WORK EXPIRIENCE

Group Project, Illegal Maritime Activities Monitoring System
April 2024 - June 2024

- Learn how to utilizes Global Fishing Watch API to provide up-to-date insights and analytics on maritime activities
- Integrates Protected Planet GeoJSON for enhanced geographical data visualization and analysis
- Ensures adherence to international regulations through comprehensive monitoring capabilities

Research, Text Based Emotion Detection Using Unsupervised Machine Learning
April 2024 - May 2024

- Conducted a comprehensive study on emotion detection methodologies using unsupervised learning techniques
- Utilized data preprocessing and feature extraction techniques to improve input data quality.
- Implemented various unsupervised learning algorithms
- Analyzed and evaluated the performance and accuracy of different algorithms in emotion detection.
- Documented research findings and presented conclusions on the viability of unsupervised emotion detection.

Group Project (MakeMeUpzz), Make a e-commerce website
May 2024 - June 2024

- Learn on how to develop a website using different tools such as ASP.NET
- Use other language such as C# and other programming language to build the front end and back end of the website

Group Project, Mobile Project E-Library Book Store
October 2024 - January 2025

- Made a library Store app on mobile (not published)

Internship, Website Developer In Implementation Team
Febuary 2025 - present
- Focus on implementing various changes based on user/client needs
- Debug, troubleshooting, and bug fixing

EDUCATION

SMA BPK Penabur Holis
(2019 - 2022)
- Science Major
- Took an extra course on photography

Bina Nusantara University
(2022 - Present)
- Computer Science - Software Engineer

VOLUNTEER EXPERIENCE

Socialize Racism Awareness at SD Santa Angela
- **Educates student of Santa Angela Elementary school about awareness of racism**

Leads Anti Bullying Campaign in Church Community
- **Manage college team consists of five people to socialize in a IFGF Church Cell community (Caregroup)**

Community service by reforestation in Tahura Djuanda, Bandung
- **Reforestation by helping to plant some small trees in the forest**

HARD SKILL

HTML
CSS
Javascript
Java
C
Python
Angular
PostgreSQL
Camunda

SOFT SKILL

Teamwork
Adaptability
Communicative
Problem Solving

LANGUAGE

Indonesia
English
